

Stroke Recovery

A post-stroke patient requires investment in rehabilitation processes as soon as possible to restore independence. Crestwood Care Centre's Stroke Recovery Program is designed to build physical, mental and emotional strength.

A customized program is implemented by our team of nurses, therapists, nutritionalists and social workers to work in tandem with our neurologists and physiatrists.

Treatments often include:

- Physical, occupational and speech therapy
- Gait, balance and mobility training
- Psychological and social support
- Bowel and bladder management
- Dysphagia therapy

In conjunction with physician support, our nurses provide continuous medical and nursing care including vital sign monitoring, administration of medicines and treatments and assistance with activities of daily living.

Our staff provides a supportive environment and educational materials that allow patients and their families to learn how to adjust to the disabilities a stroke may cause.

About Us

Crestwood Care Centre offers short term rehabilitation and long term care. We focus on individualized patient care to bridge the gap between hospital and home.

We specialize in:

- Dialysis
- Alzheimer's/Dementia
- Physical Rehabilitation
- Post-Surgical Wound Care

Crestwood Care Centre minimizes the stress associated with transferring you or your family member to multiple health care settings. We employ trained clinicians and partner with leading physician specialists to accommodate your complex care needs.

We offer a concierge staff to ensure family members are informed and familiar with treatment programs from admission to discharge.

Our Joint Commission Accreditation is a distinction bestowed on facilities exceeding the standards of Illinois Department of Public Health. This distinction enables us to accept a variety of payment sources including: HMO Insurance plans, long-term care insurance (LTC), Medicare and Medicaid.

We are conveniently located on the southwest side of Chicago in Crestwood, IL accessible by public transportation and major expressways.
